

FinNexus

The first decentralized leverage token

**FINNEXUS IS A DEFI PLATFORM SPECIALIZED IN OPTIONS AND FINANCIAL DERIVATIVES
HARNESSING THE POSSIBILITIES OFFERED BY BLOCKCHAIN TO BUILD AN ARRAY OF INSTRUMENTS
AND SERVICES ACROSS MULTIPLE CHAINS AND LAYERS.**

CURRENTLY WE OFFER THREE MAIN SERVICES

**STAKING & MINING ON
ETHEREUM, WANCHAIN
AND BINANCE SMART
CHAIN (BSC)**

**OPTIONS TRADING WITH
AN ARRAY OF
COLLATERALS AND A
UNIQUE POOLED LIQUIDITY
MECHANISM**

**WE ARE INTRODUCING
DECENTRALIZED
LEVERAGED TOKENS, A
FIRST IN THE DEFI SPACE**

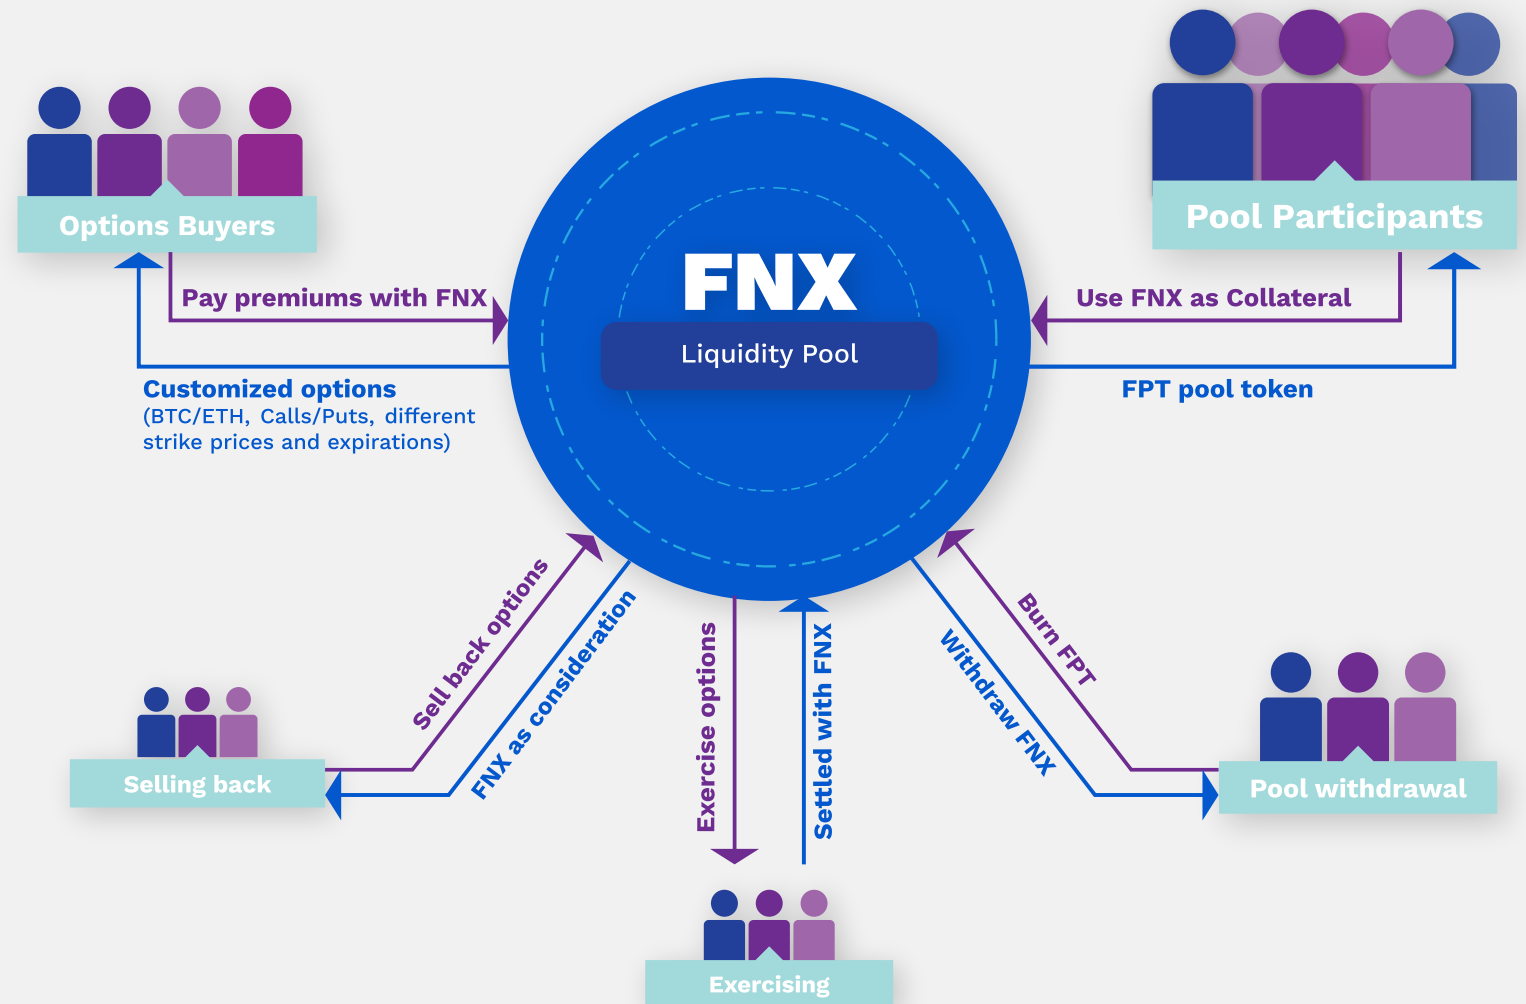

A single liquidity pool acts as the seller of all options.

All options are American type and can be exercised or traded against the pool

Buyers can tailor their options exposure according to their own needs.

Premiums are shared among pool participants.

Security is maintained by high collateralization ratio

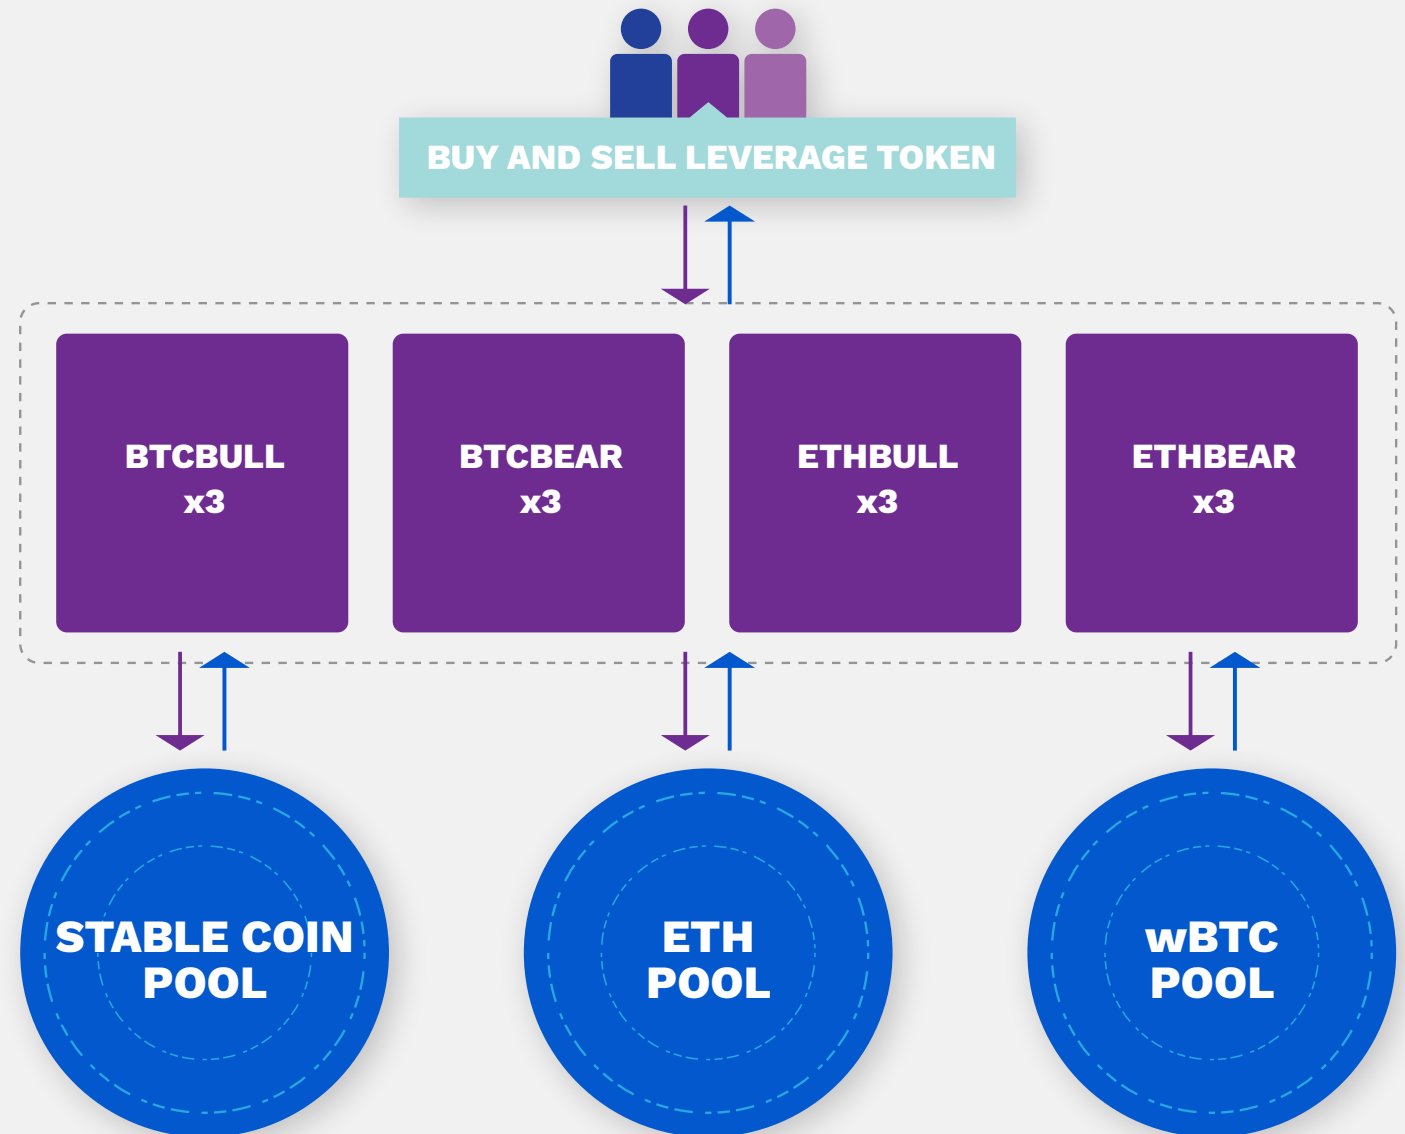

A single monolithic liquidity pool is created as the seller of all options.

All options are American type and can be exercised or traded against the pool;

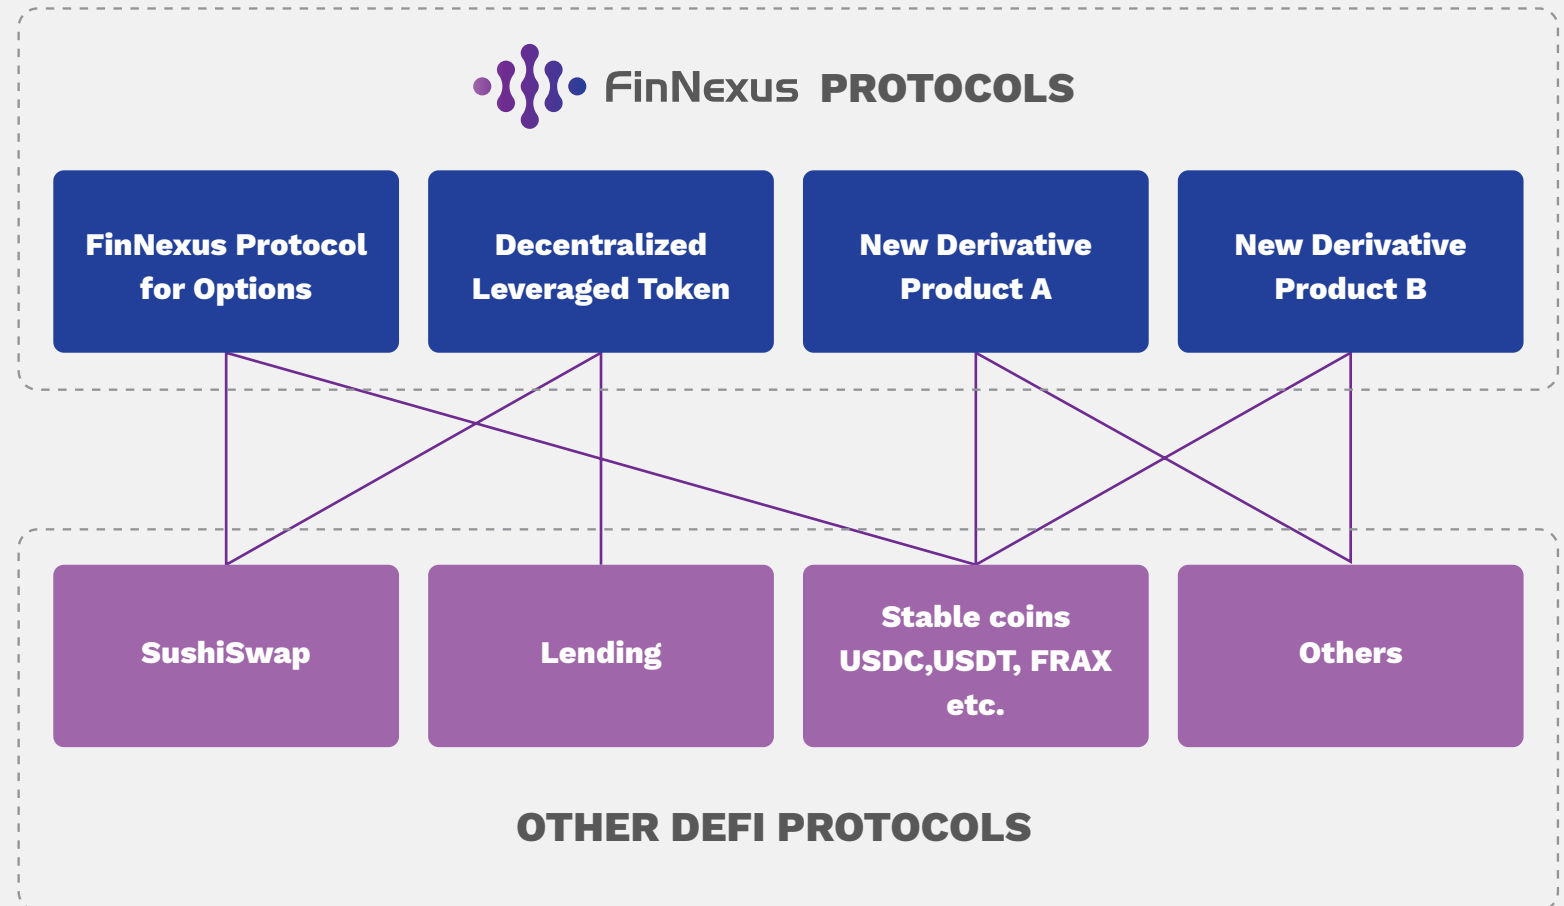

Buyers can tailor their options exposure according to their own needs.

Security is maintained by high collateralization ratio.

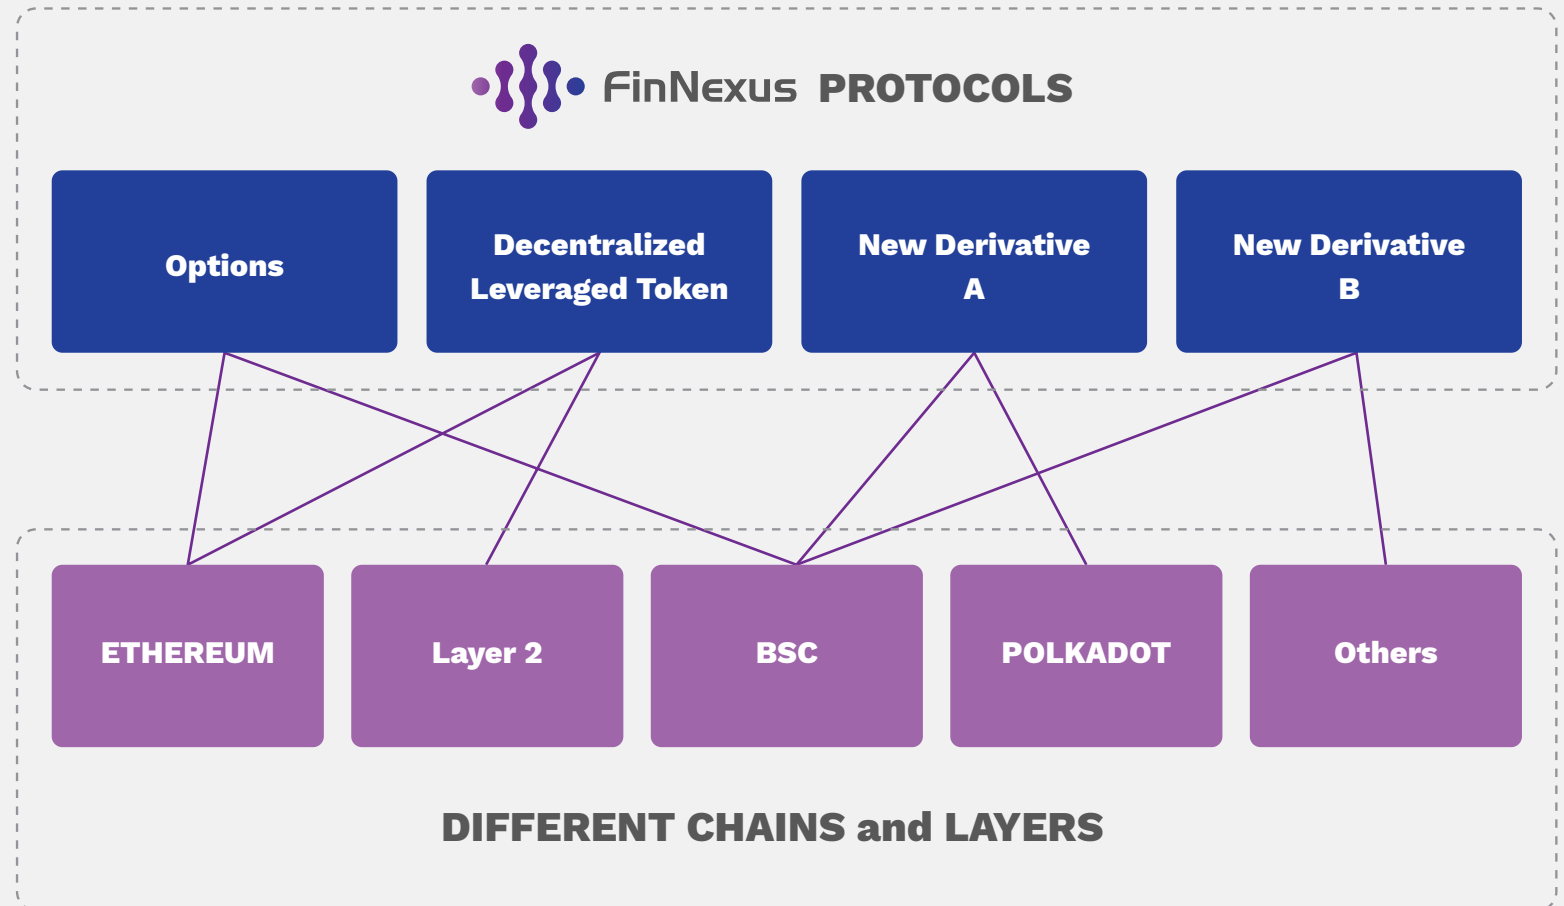

The FinNexus team is now working on a series of upgrades and new products, with an eye on creating more derivatives needed by the DeFi market. These protocols will interact with other DeFi protocols, akin to what we have implemented with Frax Finance and SushiSwap.

Beside is a graphic representation of how this interconnected DeFi ecosystem will look like as our offer expands, linking the FinNexus protocol with other platforms through new products and services.

Currently, FinNexus operates on Ethereum and Wanchain, while we are soon to launch on Binance Smart Chain (BSC). As we introduce new instruments and interact with other DeFi projects, we are also planning to deploy on multiple chains and layers, further expanding our business reach and improving our value proposition

Beside you can visualize our plan

BSC DEPLOYMENT IN THE END OF MARCH

**TEST VERSION OF LEVERAGE TOKEN
WILL BE ONLINE IN THE EARLY OF APRIL**

**FORMAL VERSION OF THE LEVERAGE
TOKEN WILL BE ONLINE IN THE END OF APRIL**

**LEVERAGE TOKEN WILL BE DEPLOYED
ON ETHEREUM AND BSC**
